Protech Home Page Content

Protech is an IT service company that offers comprehensive ERP solutions and Outsourcing Advisory Services (OAS) for various businesses. Our solutions cover supply chain management, manufacturing, customer relationship management, finance and HR. We help our clients stay ahead of their competitors through our cutting-edge, matchless and smart solutions. Right from analyzing, planning and coordinating to implementation, monitoring, troubleshooting and maintenance, our professionals can offer flawless and expert solutions to small, mid-size and large-sized corporations.

At Protech, we strongly believe that each business is different in its own ways and hence we offer custom ERP solutions and Outsourcing Advisory Services (OAS) based on your diverse business needs. Protech's services help you take informed decisions that are critical to your business. We help you determine the ambiguities, prioritize projects, and help you become aware of business changes that need your attention. We help you transform your business by providing you the resources and expertise to combat any sort of business breakdown whether it is related to procedures or technology.

Our professionals are well-qualified and can perfectly handle various intricate ERP solutions and Outsourcing Advisory Services. Whether you need our robust solutions on short-term or long term basis, Protech's proficient team will always be there to assist you. While providing high-tech, quality and secure solutions, we also keep your budget in mind. Contact Protech today for solutions that will help you focus on your core business with peace of mind.

ERP Consulting Page Content

SAP installations have been done globally in thousand of organizations and have revolutionized the way businesses function. SAP is leading enterprise software owing to numerous cost and performance advantages that it offers. SAP implementation is a long process and results in many changes in your business processes and functioning.

At Protech, we help you execute complete SAP process from start to finish in a planned and systematic way. Our SAP consultants and administrators take complete responsibility from cost analysis, planning and creating architecture to SAP installation, determining processes, and SAP training till the project goes live.

Our SAP consulting team includes certified SAP professionals with years of experience in carrying out SAP implementation for a variety of clients. Whether it is SAP project preparation, SAP data center requirement, SAP documentation, SAP functional and regression testing, SAP disaster planning or SAP functional development, our specialists are well-versed with all aspects of SAP implementation. We can provide SAP solution for Sales & Distribution (SD), Materials Management (MM), Finance & Controlling (FI/CO), Warehouse Management (WM), Supply Chain Management and Human Resources.

We understand your business needs and help your business benefit from best practices suggested by our experts. If your business already has SAP, we can help you with SAP optimization and improvement for best results. We also ensure that while providing SAP implementation and SAP consulting services costs and risks are reduced to minimum.
